

SCIENCE FOR THE BENEFIT OF HUMANITY

February 2, 2012

Prof. Giovanni Batignani, Direttore  
INFN, Sez. Di Pisa  
Edificio C - Polo Fibonacci  
Largo Bruno Pontecorvo 3,  
56127 Pisa, Italy

Dear Professor Batignani,

Sebastian White, who has held a number of positions at Rockefeller University, primarily in the Experimental High Energy Physics Lab, recently moved to the Center for Studies in Physics and Biology under my sponsorship. As he has received, this month, an award in excess of 1 year's salary from BNL enabling him to develop new directions in his career, I encourage him to pursue the collaborative contract with INFN-Pisa that is proposed. During the coming year he has no obligation to be at the University but I understand that he will return from time to time to his office here.

If you have any further questions please do not hesitate to contact me.

Sincerely,

Nicola N. Khuri
