

Technical drawing of a drainage channel. The top part shows a cross-section with a central slot. The width of the slot is indicated as 0.500. The diameter of the slot is indicated as Ø0.125. The bottom part shows a perspective view of the channel, which is a long, narrow, rectangular structure with a central slot. The slot is covered by a series of small, rectangular, raised covers. The channel is shown in a perspective view, with the top and bottom edges clearly defined. The central slot is the main feature, and the covers are designed to prevent debris from entering the drainage system.
